

100 Ways to Cut 100 Calories

Maintaining a healthy weight depends on achieving energy balance. This is accomplished by balancing the amount of energy burned and food consumed in your day.

To stop weight gain, most Americans need to do just two simple things:

- Add 2,000 more steps each day
- Eat 100 fewer calories daily

Small changes in the foods you eat and the portion sizes you choose will quickly add up to 100 reduced calories or more! Make small changes each day and you'll see how easy it can be to achieve energy balance. No one tip by itself will equal 100 calories exactly, but selecting a few of your favorites each day will get you well on your way!
