

Curriculum Vitae

Mahfuz Rahman, PhD

Associate Professor/Plant Pathology Extension Specialist West Virginia University
Morgantown, WV 26506, USA.

E-mail: mm.rahman@mail.wvu.edu

EDUCATION

PhD. Plant Pathology

SIMON FRASER UNIVERSITY, Burnaby, BC, CANADA.....2006

M. S. Plant Pathology

OREGON STATE UNIVERSITY, Corvallis, OR, USA.....2001

B. Sc. Agriculture (Hons)

BANGLADESH AGRICULTURAL UNIVERSITY, Mymensingh, Bangladesh.....1991

CAREER HISTORY

- Associate Professor & Director of WVU Plant diagnostic clinic.....5/2017-present
West Virginia University, P.O. Box 6108, Morgantown, WV 26506.
- Assistant Professor.....6/2011-5/2017
West Virginia University, P.O. Box 6108, Morgantown, WV 26506.
- Research Associate (Post doc).....4/2007-6/2011
North Carolina State University, Raleigh, NC 27607
- Post Doctoral Fellow.....5/2006-4/2007
Department of Biology, Simon Fraser University, Burnaby, BC, Canada
- Graduate Research Assistant (PhD).....9/2001 – 4/2006
Department of Biology, Simon Fraser University, Burnaby, BC, Canada
- Research Assistant.....1/2001 – 8/2001
Department of Biology, Simon Fraser University, Burnaby, BC, Canada
- Graduate Research Assistant (M.S.).....4/1998 – 12/2000
Oregon State University, Corvallis, OR

- Research Scientist (Plant Pathology).....9/1991-3/1998
Bangladesh Rice Research Institute, Gazipur, Bangladesh

RESEARCH INTEREST & ONGOING RESEARCH

My applied and adaptive research program at West Virginia University is focused on finding multi-tactics based sustainable options for managing economically important diseases on fruits and vegetables. This integrated approach encompasses utilization of host resistance, cutting-edge technology such as PCR, qPCR, RTqPCR and next generation sequencing for early and accurate plant disease diagnosis, well-timed application of highly efficacious products as dictated by disease prediction model. Early and accurate diagnosis of plant problem remains the cornerstone of my research program that helps growers preventing major losses due to disease by avoiding the use of potentially infected transplant material or early application of remedial measures. For example, latently/quiescently infected tips and plug plants are major source of anthracnose disease in plug production system and fruiting field, respectively. Development of a reliable technique to quantify the extent of latent infection in transplant material complemented with a framework of disease-free transplant supply system is among a few ongoing research projects in my lab. Optimization and application of non-chemical based sustainable options such as use of beneficial microbes, bio-fumigation, grafted plants on resistant root stocks and UV-C for plant disease management in protected culture are a few examples of research priorities. I published 40 peer reviewed journal articles, 7 peer reviewed book chapters, 70 extension and outreach articles, 31 abstracts and proceedings and 17 peer reviewed research reports from my program.

PUBLICATIONS

Peer Reviewed Journal Article

PEER REVIEW PANEL MEMBER

- Northeast SARE 2018 Graduate Student Research Grant review panel
- Northeast SARE 2017 Research and Extension grant review panel

- Northeast SARE 2015 Graduate Student Research Grant review panel
- NC IPM Program Advisory Committee Mini Grants Review 2009

AWARDS AND HONORS

- WVU Extension Service communication award for Ag and Natural Resources team-2020
- National champion-NACAA Communications Award for Team Newsletter-2017
- State Champion-NACAA Communications Award for team poster presentation-2017
- Team Program Excellence Award-diagnostic team, West Virginia University Extension-2013
- Outstanding research and service award, North Carolina Strawberry Association-2009
- Health Product and Functional Food Award, BC Innovation Council, British Columbia, Canada-2006
- Graduate Engineering and Technology (GREAT) Award, Science Council of British Columbia, Canada-2004
- Bangladesh Agriculture Research Council Graduate Study Abroad Fellowship (sponsor: World Bank)-1998

ONGOING RESEARCH PROJECTS

- Optimization of preventative biorational strawberry fruit and root disease management techniques: linking university research to growers' education; Northeast SARE. Funded amount \$244,349 (2020-2023)
- Management of powdery mildew in greenhouse and high tunnel tomatoes by using UV-C light; Northeast SARE partnership. Funded amount \$29,171 (2020-2023)
- Regional approach to cucurbit downy mildew prevention, monitoring and management; Multi state SCRI. Funded amount (\$0.85 million), WVU \$21,500 (2018-2022)
- Improved Bitter Pit Management on Honeycrisp Apple in WV Orchards to Facilitate Better Marketing. WV-specialty crop block grant (USDA-NIFA); Funded amount \$25,000 (2020-2023)
- Performance of several bio-rational compounds (Pest Problem Without Solution-Integrated Solutions) on eggplant for the management of Verticillium Wilt caused by *Verticillium dahliae*. USDA-National Institute of Food & Agriculture. Funded amount \$24,000 (2019-2021)

- Plant and Pest Identification in WV. Cornell University. Funded amount \$49,600 (2019-2021)
- WV Extension Implementation Program. USDA-National Institute of Food & Agriculture. Funded amount \$389,000 (2017-2021)

COMPLETED RESEARCH PROJECTS

- Improving strawberry transplant vigor with bio-rational treatments for managing black root rot complex. Northeast IPM center (Cornell University). Funded amount 59,890 (2018-2020)
- Incorporation of disease resistance in tomato variety ‘WV 63’ to better manage foliar diseases. Principal investigator Mahfuz Rahman, Co-investigator Mannon Gallegly. Specialty crop block grant, funding amount \$15,534 (2016-2018)
- Management of soilborne diseases in small farms with eco-friendly treatment options; Principal investigator Mahfuz Rahman, Co-investigator Lewis Jett. Funding amount \$14,614 NE-SARE grant (2015-2017)
- Integrated Pest Information Platform for Extension and Education (iPIPE). Multi state USDA-CAP (food security) grant (\$3.7 million); Principal investigator Scott Isard; WV: Mid-Atlantic tree fruit iPiPE-CPP coordinator Mahfuz Rahman \$82,000 (2015-2017)
- WV Extension IPM Implementation Program: research and demonstration of appropriate technologies to minimize pest damage on crop commodities. Principal investigator R. Chandran, M. Rahman, D. Frank, M. Danilovich, Funding amount \$253,500 (2015-2017)
- Detection and discrimination of closely related fungal species through utilization of high-resolution melt curve analysis in real time PCR to aid in quick and precise plant diagnostics. Principal investigator Mahfuz Rahman. Funding amount 21,500 (7/2016-6/2017)
- Strategies for minimizing losses of landscape trees from diseases with emphasis on Rhizosphaera needle cast on Colorado blue spruce. Principal investigator M. Rahman, D. M. McGill, K. C. Cox and S. Jarvis. \$4,500 Public Service grant.
