

Breeding Rabbit Individual Doe Record

Maintain a record for each doe included in your project. This is a lifetime record for this doe. Please update it annually and turn it in with your completed record guide.

Doe Name or Number:												
Litter Information				Number of Young				Juniors Saved		Weight		
Litter #	Ear #	Date Bred	Date Kindled	Born	Left	Added	Raised	Bucks	Does	21 Days*	6 Weeks	10 Weeks

*Total litter weight at 21 days is a good indicator of milk production since the doe produces more than half her total milk yield during that time, and the kits generally consume only milk during that period.

Doe Facts

Record here any important information for this doe (e.g., show records, etc.).
